

Subject: non-animal test methods  
Date: Sunday, May 27, 2007 6:05 PM

I am asking that your organization please accept internationally validated non-animal methods, including non-animal test methods for skin and eye irritation, phototoxicity, and pyrogenicity (fever induction), and [follow the additional December 2006 recommendations of the animal protection community](http://www.stopanimaltests.com/pdfs/ICCVAM-5yearplan-Final.pdf) <<http://www.stopanimaltests.com/pdfs/ICCVAM-5yearplan-Final.pdf>> .....immediately.

Please stop clinging to decades-old animal-poisoning tests that were never proved to be relevant to humans to begin with. Isn't it time with come out of the Dark Ages?

Warmest regards,

Kerri Milam
